COMMUNITY WELFARE SOCIETY (CWS)

ANNUAL REPORT

2021-2022

Fr. John Alapatt SVD

The bust of Fr. John Alapatt SVD, founder of Community Welfare Society was installed in the premises of CWS Hospital, Jagda, Rourkela on 8th August 2021.

We look back at the year (2021-22) with a lot of satisfaction. We have achieved a lot as a team and implemented many projects and continued with all our programmes. The support, appreciation and encouragement from our donors, supporters and target population have been enormous.

During the months of April, May, June and July when the second wave of the pandemic peaked and many people lost their lives, our community health workers went from family to family in the slums of Rourkela looking for patients who were showing symptoms of COVID-19 and were remaining at home. They advised and motivated them to go to hospital and get the covid test done. The pulse-oximeter and infrared thermometer that they carried helped them to convince the family members of the urgency of healthcare for their dear ones who had covid symptoms. Families which were having problems for food were identified and provided with dry ration kits. In CWS Hospital, by conducting COVID-19 antigen tests, making facilities for OPD consultations and serving the COVID-19 patients in IPD, we contributed our mite to the healthcare sector. A big thanks to our staff.

Once the pandemic subsided, we continued with our regular programmes. The succeeding pages of this document will give detailed description about those. However, a programme that I greatly admire and is close to my heart is 'Home Based Palliative Care'. By caring for terminally ill patients, treating them symptomatically and instructing the relatives of patients on how to care for terminally ill patients CWS has become a household name among its beneficiaries. Further, the inclusive approach we have adopted for this programme has connected us with the rich and poor alike. Here, I would like to thank each and every person who has contributed towards our programmes financially, conceptually and with appreciation and feedback. It has helped us to grow and move forward.

Subhendra Das
President, CWS

Message from the Governing Body

Dear friends,

2021 has been a tough year for all of us against the backdrop of Covid 19. It has been much worse for the people living in the slums of Rourkela who are the main focus of our work.

In the slums people belonging to special interest groups like women, widows, young people, school going children, waste pickers, rickshaw pullers, inhabitants of leprosy colonies, old and bedridden patients in need of palliative care suffered the most as we had to suspend activities due to Covid pandemic.

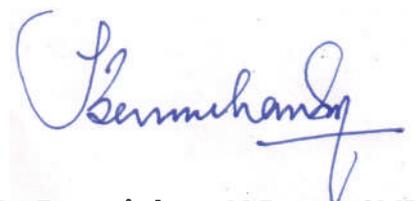

We are happy to report that CWS Hospital kept working night and day against all odds in those trying times to provide succour to the sick and the dying.

When the Covid pandemic subsided, we restarted the activities with renewed vigour among the most vulnerable people living in the slum and non-slum areas of Rourkela.

This Annual Report presents a bird's - eye view of the manifold activities of CWS and its impact on the lives of people. This report makes use of photos and illustrations and in that sense differs from previous reports. Hope you find this report more useful and interesting.

We thank you for your generous support and express our gratitude to you on behalf of the people with and for whom we work.

On behalf of the governing body,

Fr. Bennichan K Peter SVD

Vision & Mission

Vision

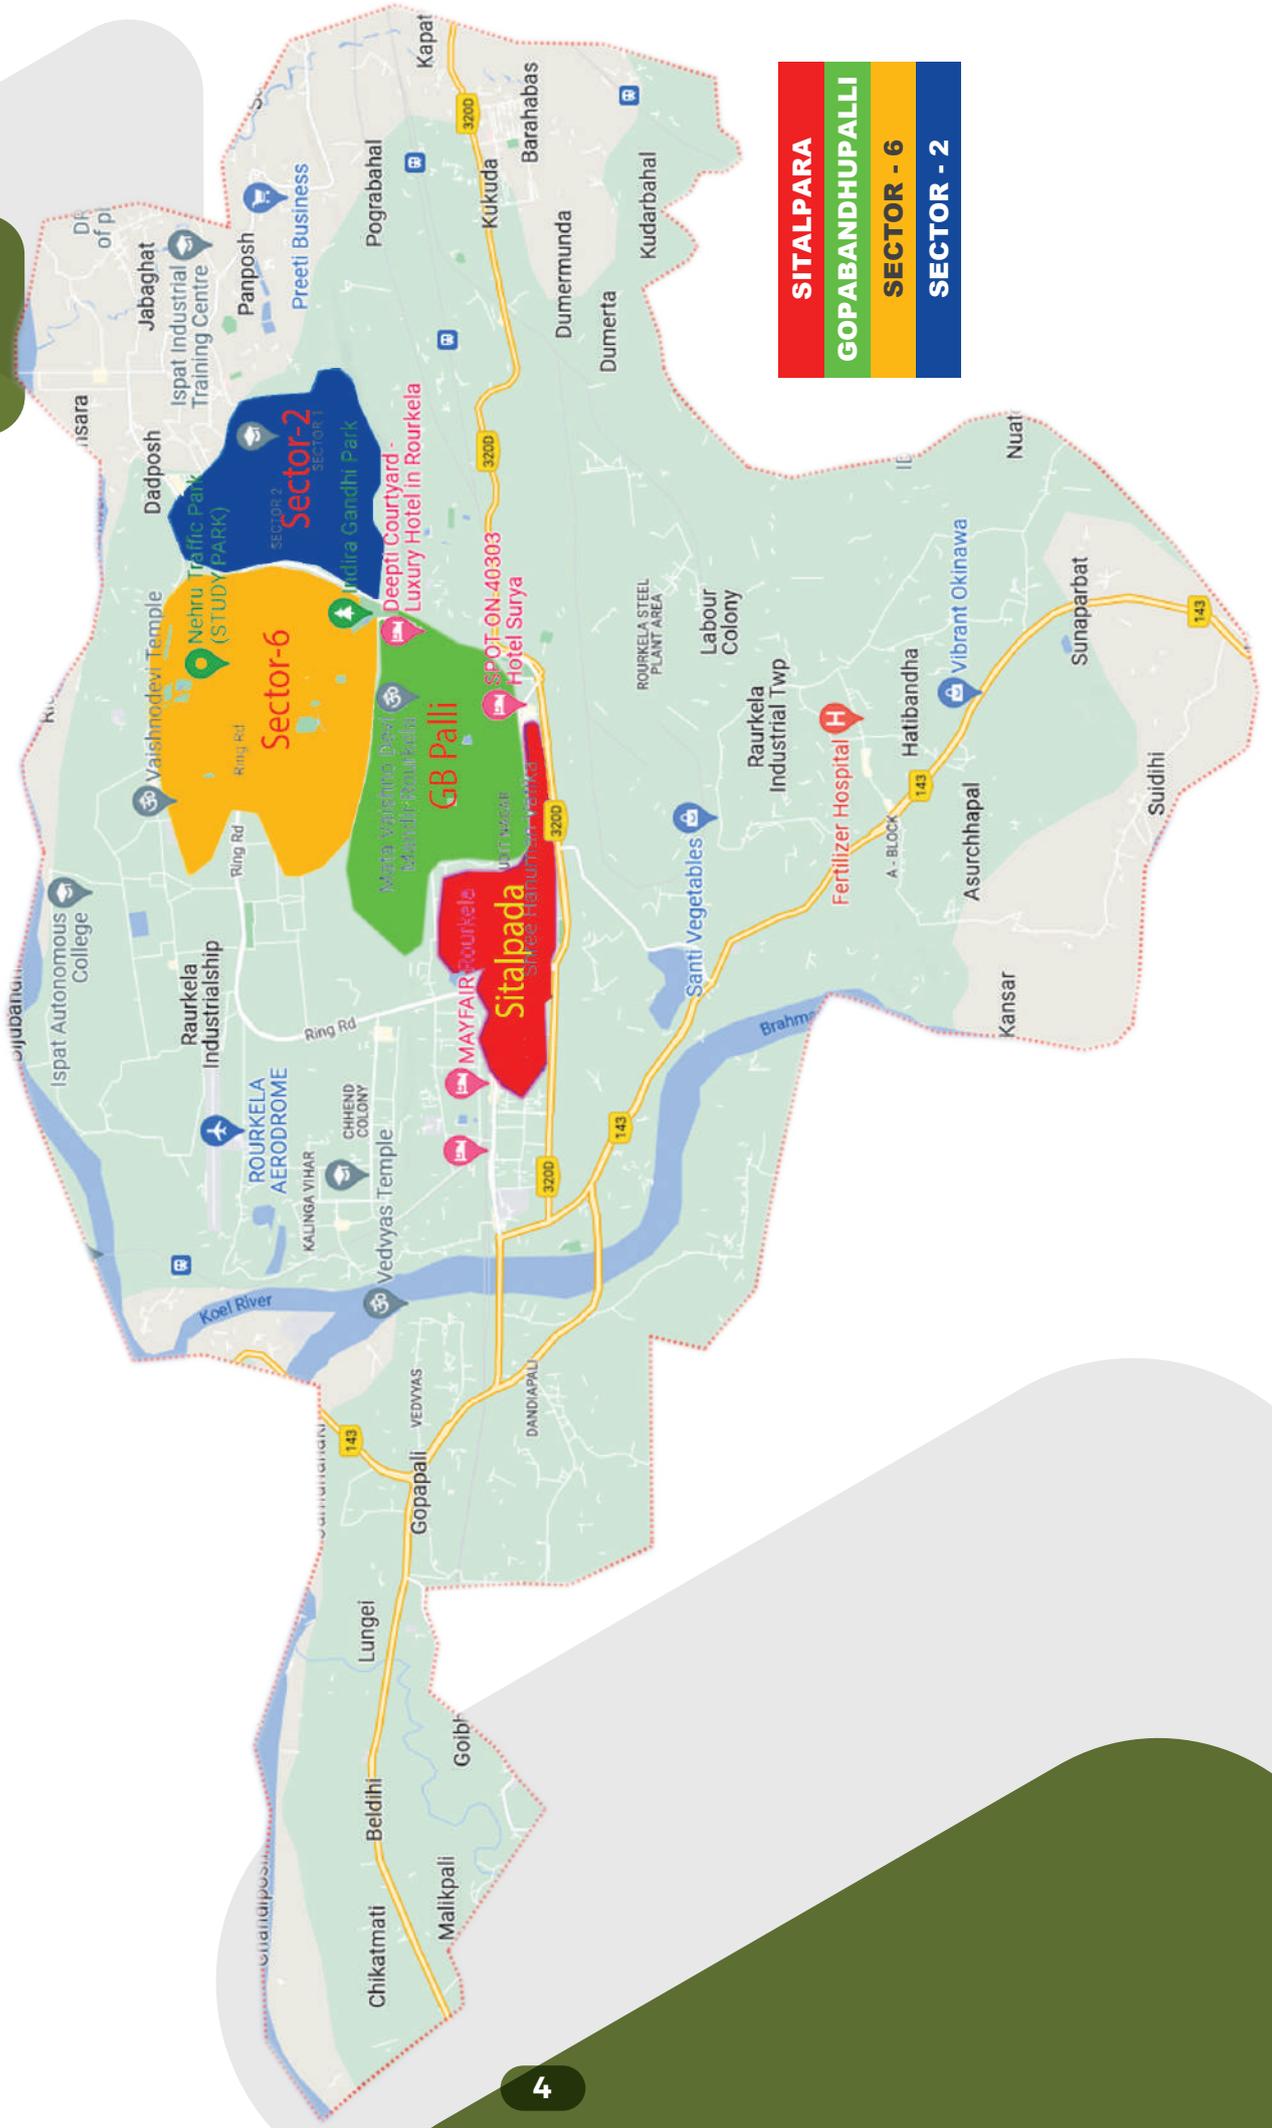

Enhance the quality of life of the people of Rourkela, especially its slum residents.

Mission

1. Form self-help groups among women, widows, youth, waste pickers, rickshaw pullers and former leprosy patients living in the slums.
2. Improve health and hygiene through the promotion of community health and hospital services for slum residents.
3. Provide free home-based palliative care services to all residents of Rourkela.
4. Provide quality medical care to all through CWS Hospital, Jagda, Rourkela.
5. Create facilities and enabling environment for formal education of slum children.
6. Promote skill development among slum youth for gainful employment.
7. Organize seminars, meetings and training programmes on social issues and their amelioration among people living in the slums.

Our areas of intervention in the slums

Slum is the abode of the poorest people in the city. CWS deals with the most vulnerable groups among the poor living in the slums.

Women in general and widows in particular.

Leprosy affected people living in the colonies

Old, bed ridden or terminally ill patients Rickshaw Pullers,

Waste Pickers Youth, School going children

Women empowerment

Historically women have faced discrimination all over the world. To empower women, seats were reserved for women in Panchayati Raj institutions in India from 1992. Odisha now has half the seats reserved for women in Panchayati Raj institutions.

CWS has 17 women animators working for the empowerment of women in their respective areas/fields. Besides women, all of them devote a part of their time to work with and for the youth. They also liaise with the palliative care team and help in the identification of suitable patients for home based palliative care.

What do our animators do?

- Organise people into small groups
- Help them to conduct monthly meetings
- Train them to keep records and accounts
- Encourage them to cultivate the habit of saving small sums of money every month
- Promote income generating activities
- Provide monthly training on health issues like women's health, sanitation, seasonal illness, community health with flex banners
- Encourage education of children
- Help people to make best use of government facilities and schemes
- Help people obtain identity documents like aadhaar card, voter card and pan card
- Help the group to take up problems of the locality or the group with administrative authorities
- Help individuals deal with domestic violence and personal problems

Among the 17 animators, 6 work in specialized fields like leprosy affected people, rickshaw pullers and waste pickers. The other 11 animators work among the ordinary women living in the slums. These 11 animators look after 378 SHGs with 4415 members

Widows

Widows are an area of special concern under women's empowerment program. We have a social worker working full time among the widows to support them in times of problems, crises and loneliness. 267 widows are organised as members of 33 self-help groups. An association of these widows may help them to negotiate with Government departments and obtain more benefits and facilities to meet their needs.

CWS has helped the widows with the following in 2021

| | | |
|------------------------------------|---|--------------|
| Study material for Widows children | - | 115 students |
| Repair and renovation of houses | - | 14 houses |
| Blankets | - | 22 blankets |
| Regular supply of dry rations | - | 15 families |

Rehabilitation of Leprosy Affected People

CWS entered the lives of leprosy affected people living in 5 colonies in different slums of Rourkela in 2017 at the request of Missionaries of Charity Brothers. There are other NGOs and government agencies too working in these same colonies.

Colonies where CWS is working

| | |
|----|---|
| 1. | Jagannath Ashram, Sector-6, Rourkela-769002 |
| 2. | Radhakrushnapalli, Nayabazar, Rourkela-769007 |
| 3. | Deogaon, Fertiliser, Rourkela-769007 |
| 4. | Durgapur A, Basanti Colony, Rourkela-769012 |
| 5. | OSAP Burla, Nandapara, Rourkela-769010 |

Population of leprosy affected people

| | |
|--|-----|
| Total Population in 5 colonies in 2020 | 473 |
| Total Population in 5 colonies in 2021 | 460 |
| Deaths in 5 colonies in 2021 | 14 |
| Births in 5 colonies in 2021 | 5 |
| **Left the colony in 2021 | 4 |

**It was not a voluntary departure, but a family of 4 people were chased out from one colony.

People who got leprosy in the past and were forced out from their villages found refuge in these colonies. Those who live in these colonies do not have leprosy. This year a fresh case of leprosy was reported from one of the colonies. A family of three who had newly come to the colony had changes in skin pigmentation and approached the government paramedical worker. They were given medicines and are cured now.

Achievements of CWS Staff

CWS has 2 women animators and a project co-ordinator working with the people.

a) Self Help Groups

| Women's SHGs | Youth SHGs |
|------------------------|-----------------------|
| Number of SHGs-15 | Number of SHGs-7 |
| Number of members-152 | Number of members-66 |
| Savings- Rs.9,53143/- | Savings- Rs.17,265/- |
| SHGs with Bank A/c- 13 | SHGs with Bank A/c- 1 |

b) Benefits and documents obtained with the help of CWS staff

| | |
|-------------------------|------|
| Disability Certificates | - 27 |
| **Food Ration under FSA | - 20 |
| Wheel Chair | - 11 |
| Aadhaar Card | - 6 |
| Pan Card | - 5 |
| Ration Card | - 7 |
| Handicap Pension | - 4 |
| Widow Pension | - 1 |
| Old age | - 2 |

**Most noteworthy is 20 people receiving food grain rations under National Food Security Act. Biometric Identification through finger prints and Iris of the eye is used in the authentication of beneficiaries. Leprosy brings about changes in the finger-prints and Iris of the patients. CWS intervention has helped the people who failed the biometric test. The concerned government department has made special list of people who failed the biometric test so that they can get the food rations without any problem. This year 20 people were added to the special list made last year. So a total of 50 people are benefitting through the special list.

There is a sad case of a person who does not have fingers on both hands and is not on the special list. We are pursuing his case with concerned authorities

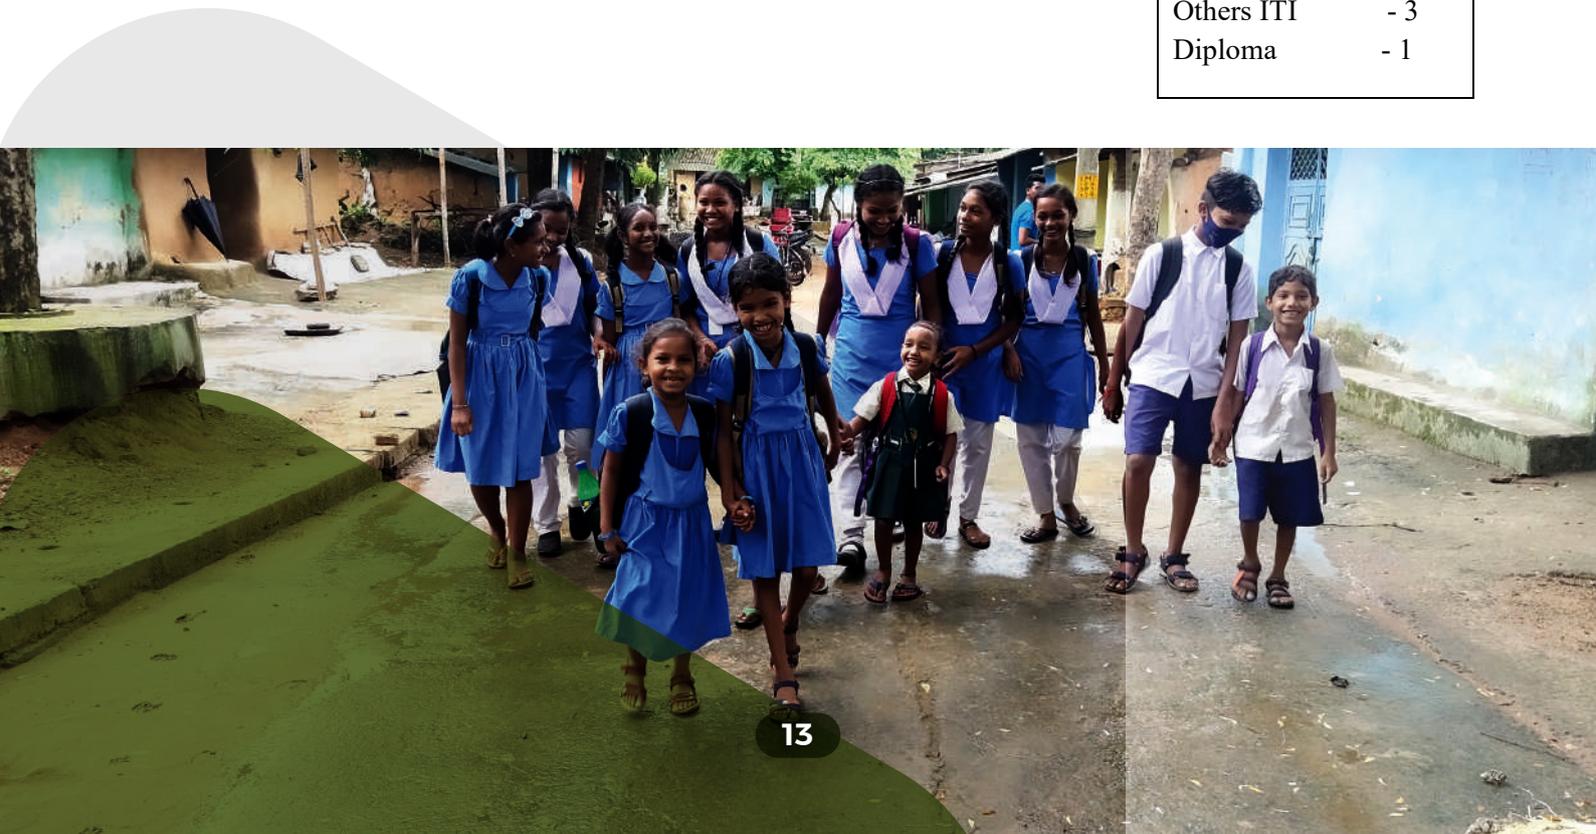

Dressing of wounds

Dressing of wounds in their locality was a major concern of the people. CWS has sponsored 3 dressers in 3 colonies (Nayabazar, Durgapur & Deogaon) who are paid 10 rupees per dressing. 8597 dressings were done in 3 colonies this year. CWS is also supplying freely dressing materials to residents of Jagannath Ashram.

Education of children

There are three tuition teachers in three colonies providing tuition classes to 32 school children.

| | |
|----------------|------|
| Primary School | - 20 |
| M. E. School | - 12 |
| High School | - 28 |
| +2 | - 12 |
| +3 | - 4 |
| Others ITI | - 3 |
| Diploma | - 1 |

Means of livelihood

Begging remains the main source of income for majority of the families. 189 people from 142 families go for begging every day. 69 families have no beggars.

Rourkela Municipal Corporation has done a good job by employing 69 people as cleaners and 2 as supervisors from the colony.

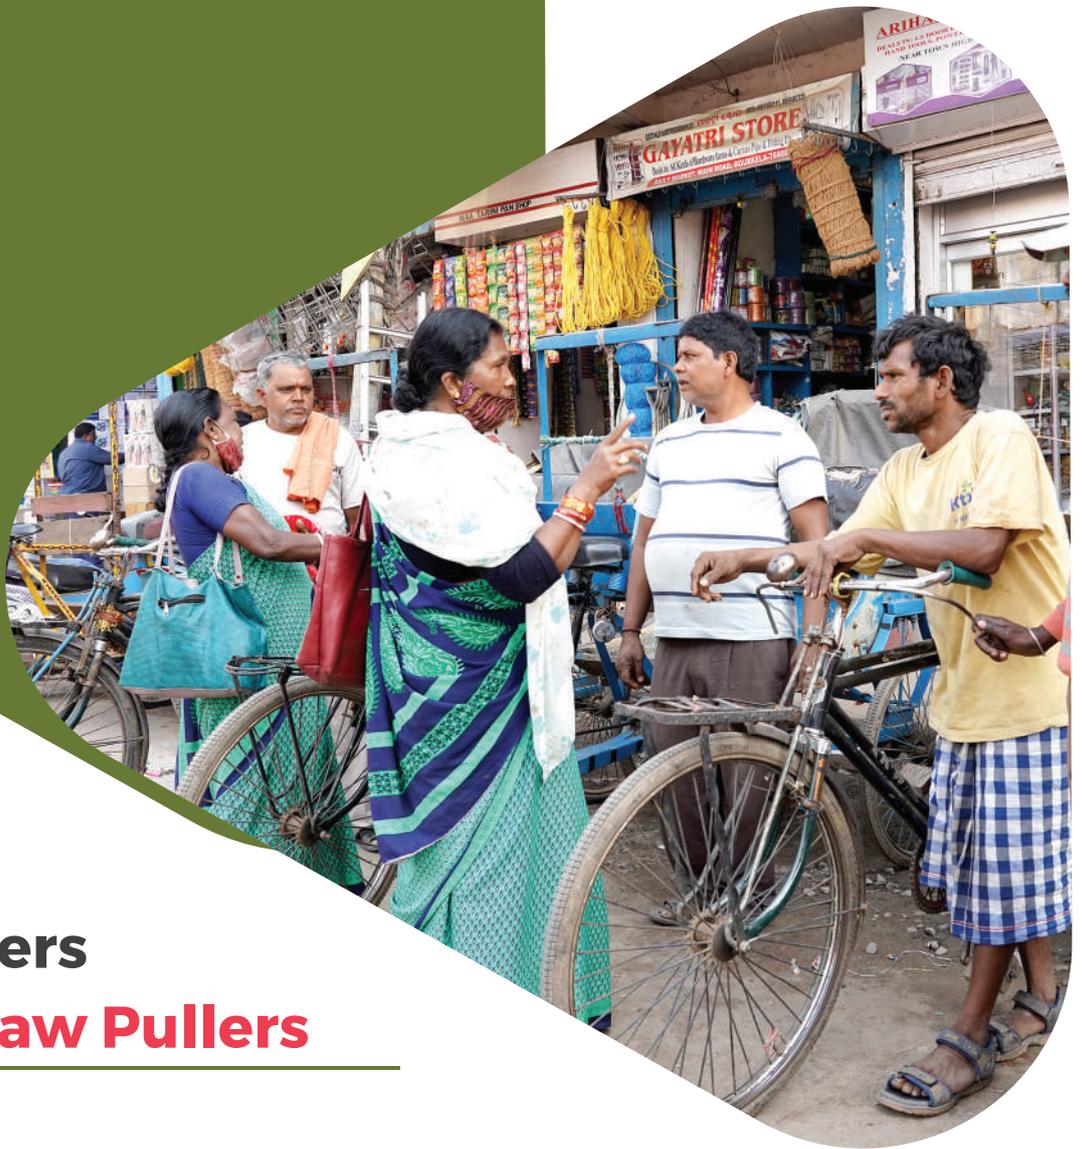

CWS has sponsored a shed for mushroom cultivation. Mushroom is cultivated in winter and the group earned a profit of 2100 rupees.

Low Cost Houses

5 low cost houses (16x11 feet) were repaired and renovated for very poor people at a cost of 304445 rupees. The beneficiaries were selected by the colony people.

Democracy at the grass roots

Leaders of colonies are elected by the people and their word is the law. But the term of the leaders is very short. In 3 colonies leaders are changed every month and two colonies every two months.

Waste Pickers and Rickshaw Pullers

Waste pickers and Rickshaw pullers are the two vulnerable groups CWS has been associated with since 2015-16. Both these groups contribute a lot towards the protection of the environment without being aware of it.

Demand for rickshaws for transport of people is decreasing while of trolleys for the transport of goods is increasing. All things considered rickshaws remain the most non-polluting means of transport and the rickshaw pullers deserve support and appreciation.

Like the municipal waste collectors, who are employed by the municipality, informal waste pickers too do a great service to the society. But their contribution to health and environment is hardly acknowledged and are often treated as a public nuisance and sometimes regarded as thieves. They collect waste materials thrown out by households and from public waste dumps.

CWS animates and helps them to form SHG groups, encourage savings, promote the education of their children, improve their health and hygiene and help them obtain identity documents so that they can enjoy the benefits of government grants and schemes.

Rickshaw Pullers 2021-22

| | |
|--|---------------|
| 1. Numbers of Rickshaw pullers involved in the project | - 176 |
| 2. Who own rickshaws | - 49 |
| 3. Who rent rickshaws | - 127 |
| 4. Daily rent for a rickshaw | - Rs.30-40 |
| 5. Average daily earning | - Rs.300-400 |
| 6. Number of children attending tuition classes up to Class 7 organised by CWS | - 57 |
| 7. SHGs formed | - 18 |
| 8. Total savings in SHGs | - Rs.38,850/- |
| 9. Number of animators employed | - 2 |
| 10. Documents and facilities obtained with the help of Animators in 2021-22 | |
| a. Aadhaar Card | - 18 |
| b. Ration Card | - 4 |
| c. E Shram Card | - 4 |
| d. Labour Card | - 6 |
| e. Bank Account | - 8 |
| f. Old Age Pension | - 3 |

Waste Pickers 2021-22

| | | |
|--|---|---|
| 1. Total Families | - | 400 |
| 2. Women SHGs | - | 48 |
| 3. Youth SHGs | - | 11 |
| 4. Savings in Women SHGs | - | Rs.3,25,533/- |
| 5. Savings in Youth SHGs | - | Rs.20,532/- |
| 6. Children attending tuition classes organised by CWS | - | 36 |
| 7. Type of waste material collected | - | Plastic bottles, Glass bottles, Scrap iron, Polythene |
| 8. Source of waste materials | - | Waste material thrown Outside the houses |
| 9. Average earning | - | Rs.300-350 |
| 10. Identity documents obtained with the help of animators | | |
| a. Aadhaar Card | - | 37 |
| b. Voter Card | - | 17 |
| c. Ration Card | - | 9 |
| d. BSKY Card | - | 4 |
| e. Bank Account | - | 40 |
| f. Pension | - | 47 |

Yuva

(Youth for Unity and Voluntary Action)

Work with youth in 6 slums began in 2016. These slums are situated at Sector-6, Shitalpara, Madhusudhanpalli, Malgodam, Sector 2 and Gopabandhupalli. The objective of the project is to motivate, help and empower the youth to deal with the problems they face and become productive citizens. The project deals with some of the major problems the youth face like high dropout rates from schools, lack of decent jobs, addiction to alcohol and intoxicants, inferiority complex and coping mechanism through the formation of peer groups and parents inability to guide their children. The project is preventive rather than curative. The curative objective of healing those who are addicted to alcohol, drugs, violence, gangsterism etc. are often ineffective, time consuming and is of limited scope.

The project has a project co-ordinator, 15 animators who work part time to help in the animation and organization of SHGs among the youth, three member training team who trains youth leaders through Youth Parliament conducted at 4 places in a month, tuition teachers for school going children, teachers for tailoring, Beautician course and Computer Course are recognized by NSDC (National Skill Development Corporation)

There are approximately 1800 youth living in the project area. We have been able to involve close to half of them in YUVA programme.

Yuva 2021-22

| | | |
|---|---|---------------|
| 1. Total Youth SHGs | - | 73 |
| Total Membership of SHGs | - | 748 |
| Girls in SHGs | - | 567 |
| Boys in SHGs | - | 181 |
| 2. Total Savings of 73 SHGs | - | Rs.5,20,304/- |
| 3. Number of SHGs with Bank Account | - | 25 |
| 4. Number of SHGs giving loans | - | 17 |
| 5. Number of youth trained as beauticians | - | 51 |
| Number of youth trained as tailors | - | 32 |
| Number of youth who have DCA (Diploma in Computer Application) | - | 57 |
| 6. Number of youth in training with CIPET, Bhubaneswar | - | 3 |
| 7. Number of Youth studying in | | |
| High school | - | 388 |
| Studying in College | - | 176 |
| Studying in Technical and vocational institutes | - | 21 |
| 8. Number of School dropouts | - | 87 |
| Number of high school dropouts helped to write Matric exam | - | 13 |
| Educational help of Rs.10,000 to youth to Complete their studies | - | 30 |
| 9. Employment | | |
| Casual workers | - | 59 |
| Shops | - | 17 |
| Factory | - | 33 |
| Unemployed | - | 89 |

Tuition Classes for School Going Children

CWS has appointed 9 tuition teachers for 125 school going children who are studying in different classes (LKG to Class 10) at different Field centres of CWS (Sector 2, Sector 6 and GopabandhuPalli). The tuition classes are conducted every day except on Sundays and national holidays. The classes last at least one and half hours. These children belong to very poor families and their parents are mostly daily wagers and domestic workers. We want to educate and empower the underprivileged children so that they can have better understanding, better emotional balance and a better future for themselves and the communities to which they belong.

Study Materials Distribution

Families who are very poor among rickshaw pullers, waste pickers, and widows are provided with notebooks free of cost to their children as they hardly earn for their living and are unable to afford it.

Plliative Care

Home Based Palliative Care

Home based Palliative Care programme which was inaugurated officially in January 2021 by the Chief District Medical Officer, Sundargarh had to be suspended in April 2021 due to Covid pandemic. The project aimed at covering 200 people from Rourkela with special emphasis on people who reside in the slums in need of palliative care. The demand for Palliative Care is such that the programme already covers 256 patients which strain our personnel and financial resources. We can either restrict the programme or expand it to cover a large number of needy patients.

Salient Features of the Programme

- It is totally free, irrespective of one's financial condition
- The services are provided at patients' home
- Seriously ill patients are covered under the programme based on thorough assessment by a medical doctor
- Programme covers 164 patients in the slums and 92 patients in the non-slum areas of Rourkela
- CVA or Stroke has affected 100 patients, high BP being the major cause for it.
- Patients are provided with pain killers, medicines for high BP, diabetes, dizziness and other medical ailments on the prescription of the doctor. Catheters, bandages, air beds are provided free as and when required. Urinary catheters are required for 15 patients, 70 patients require physiotherapy, 15 are critically ill and 30 are bed ridden.
- Every patient is visited by the staff twice in a month
- Family members are taught simple physiotherapy exercises by a physiotherapist in the beginning.
- Counselling services to the patients and the family is provided by the staff.
- The core staff consists of a medical doctor, two nurses, two auxiliary nurses, driver and physiotherapist.

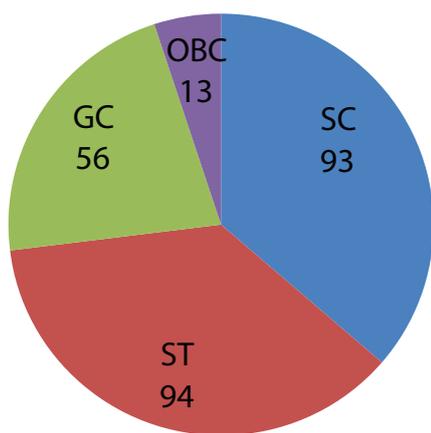

Bedsore are no more eye sores

Bedsore or pressure ulcer is a major problem with bed ridden patients. There were ten patients suffering from bedsore. All of them were healed but one unfortunately relapsed.

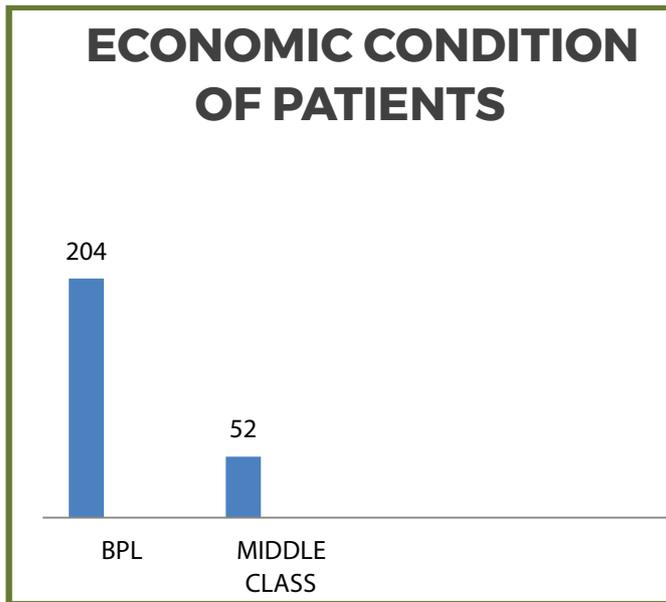

Such a high success rate in curing and preventing bedsore is a big compliment to the success of the home based palliative care programme.

43 patients expired this year. We hope and believe that our work has mitigated their suffering to some extent.

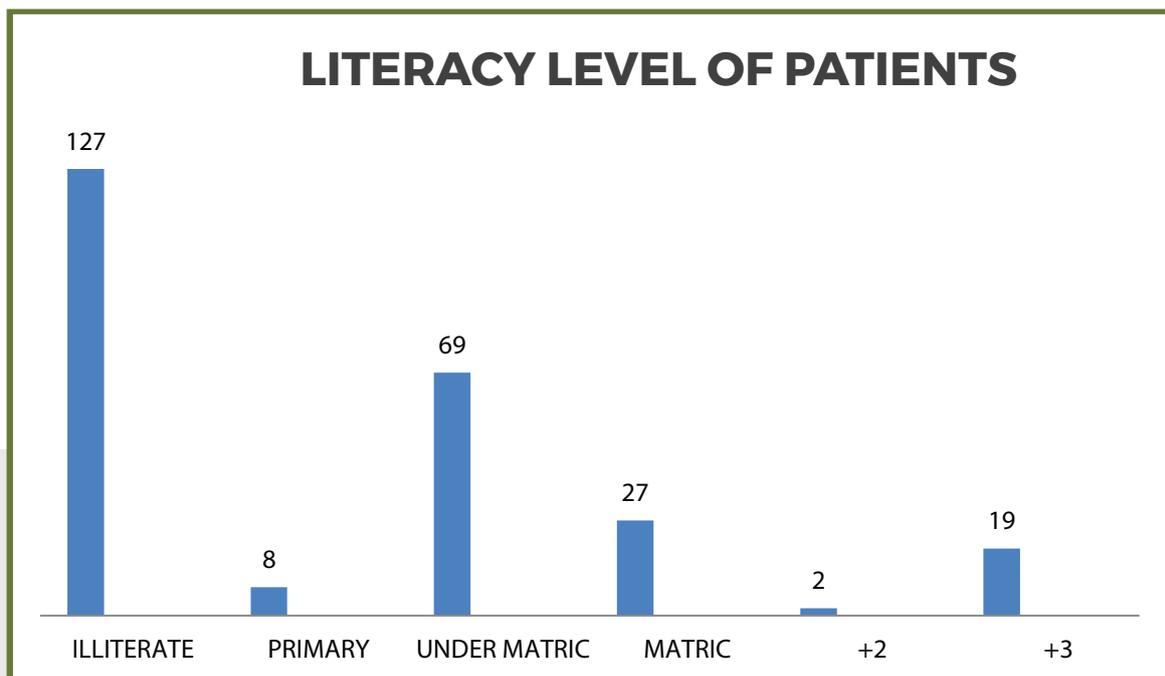

CASTE COMPOSITION OF PATIENTS

CWS Response to Covid 19

The second wave of Covid-19 infection hit Rourkela in the middle of March 2021. We saw many cases of Covid infection in the hospitals and the situation was getting worse with each passing day. By the beginning of April 2022, hospital beds in Rourkela were getting filled very fast with Covid-19 patients and reports were coming from various corners of the district about Covid-19 deaths. The following were the steps we undertook to respond to the situation and help people.

a. Distribution of infrared thermometer and Pulse-oximeter:

In collaboration with likeminded persons and organizations we distributed 112 infrared thermometers and Pulse-oximeter each to screen patients who were living in the slums or the interior villages of Rourkela and were not willing to go to hospital for covid tests or had no means to go for such test. This programme was carried out with the help of youth and community leaders in slums and villages.

b. Food kits for families, which were finding difficult to cope:

In discussion with our Coordinators and Animators we selected 520 families in the slums of Rourkela as our beneficiaries for this programme. Most of them belonged to ragpickers and rickshaw pullers. Some community and youth leaders helped us to identify the beneficiaries in some areas. We provided all of them with food kits that included rice, pulses, salt, and cooking oil.

c. Follow-up measures:

As the pandemic continued and the economy remained dormant, some slum dwellers bore the brunt- not able to have a square meal a day. We identified 42 such families and provided them with food provisions which continues even today.

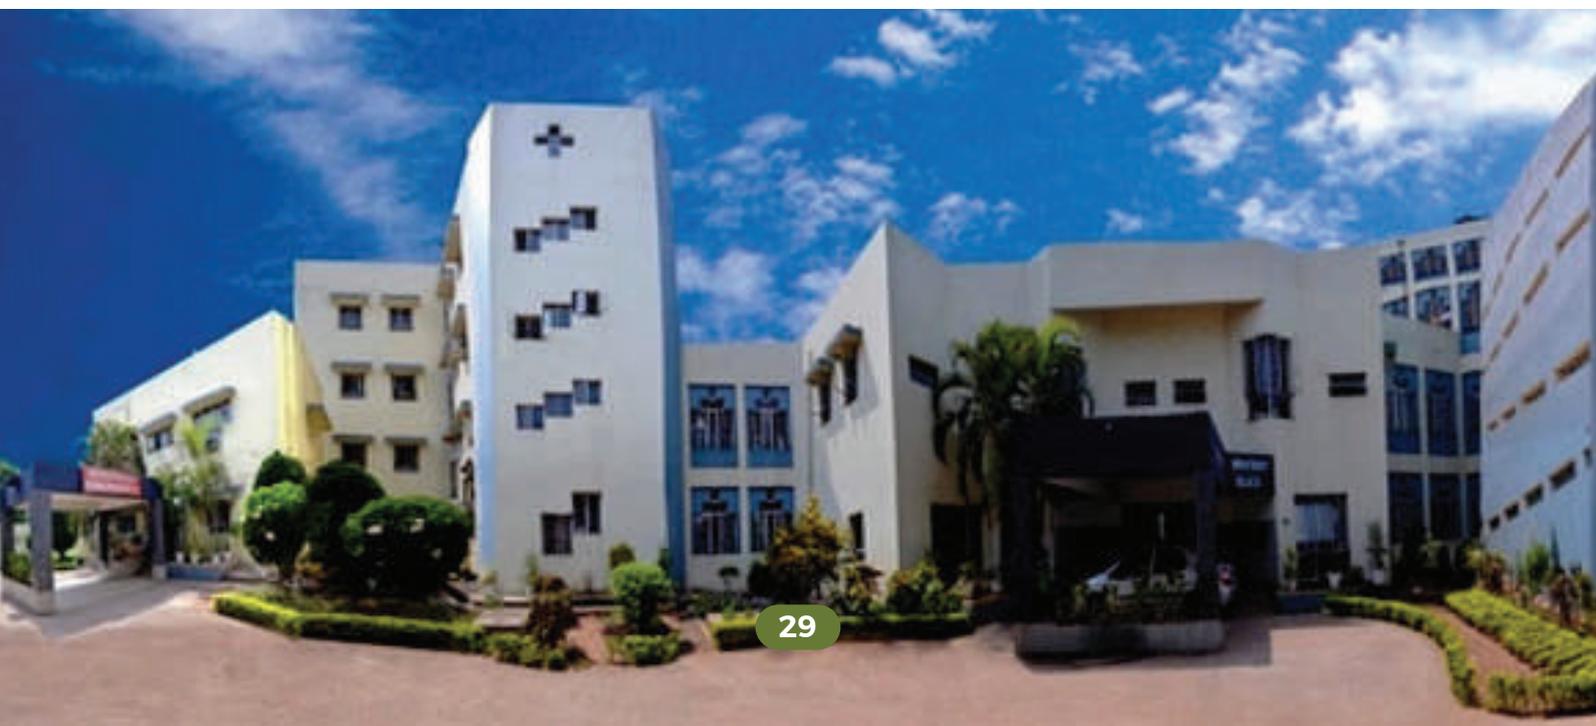

Community Welfare Society Hospital (CWS Hospital)

CWS Hospital at Jagda, Rourkela is promoted by Community Welfare Society. This hospital was built with donations from various organizations and private individuals. The hospital which was commissioned in 2002 with 50 beds has grown into a 120 bed Hospital with excellent diagnostic facilities and intensive care (ICU) and high dependency (HDU) units. This hospital is staffed by experienced and committed medical professionals devoted to high-quality patient care. Further, it is our constant concern and commitment to provide quality patient care at an affordable cost. A great number of our patients are tribals or those belonging to the poorer sections of society.

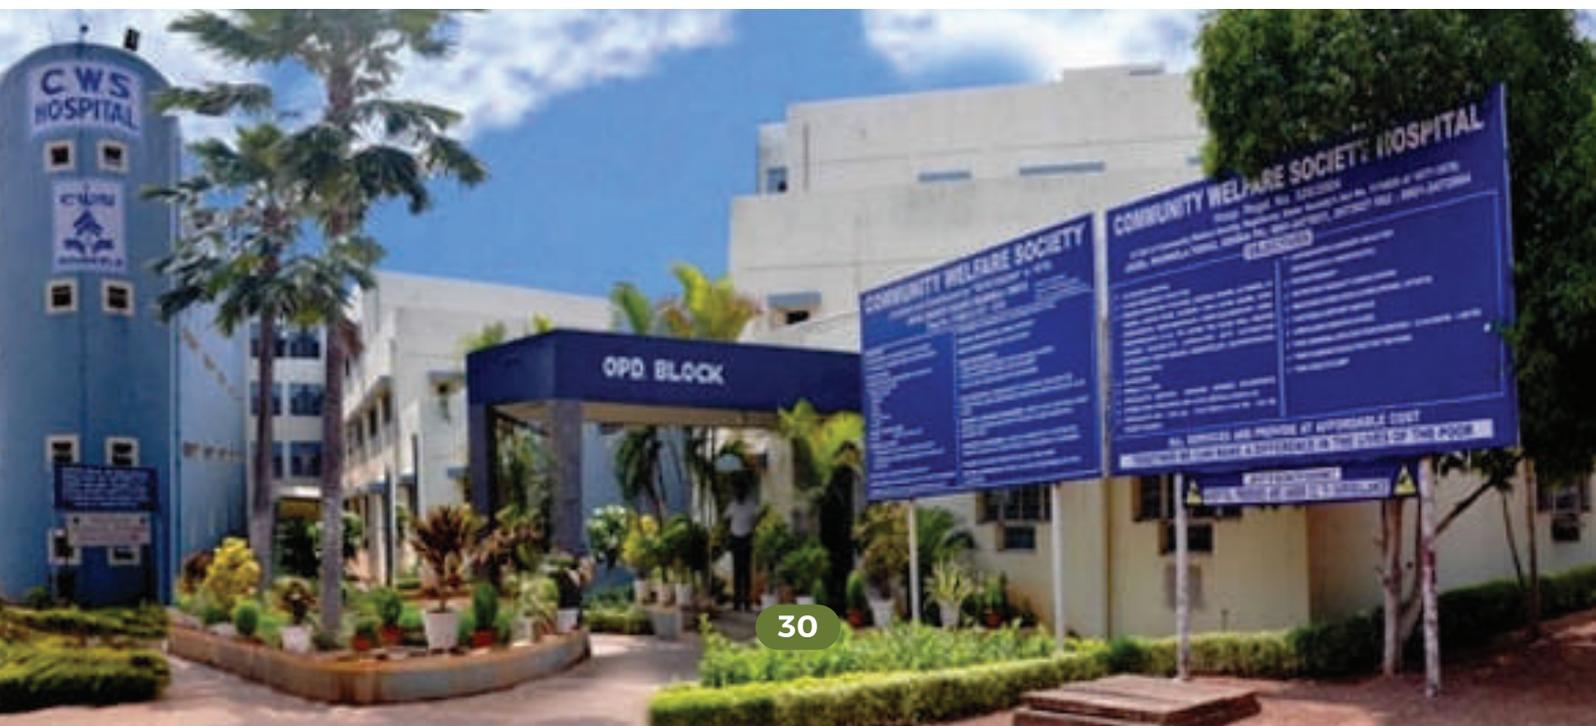

Presently the Hospital has become a referral centre to many seriously and critically ill patients of Rourkela and its peripheries, interior villages of Sundergarh district and neighbouring states of Jharkhand and Chhattisgarh.

**COMMUNITY WELFARE SOCIETY HOSPITAL, JAGDA, ROURKELA
INFORMATION AT A GLANCE**

| PARTICULARS | YR-2021-22 |
|---------------------------------|-------------------|
| TOTAL NO OF BEDS | 120 |
| IN-PATIENT | 5271 |
| OUT-PATIENT | 32301 |
| Total no of Surgeries | 1135 |
| Bronchoscopy | 5 |
| Endoscopy | 235 |
| Microbiology (CULTURE/AFB GRAM) | 2103/333 |
| Histopathology (FNAC/BIOPSY) | 578/347 |
| CT Scan | 2585 |
| X-Ray | 6800 |
| Birth | 199 |
| DEATH | 160 |

CWS Hospital and COVID 19

CWS opened a COVID-19 section during the second wave of COVID pandemic from April 2021.

| | | |
|--------------------------------------|---|------|
| Total COVID Tests (Antigen + RT-PCR) | - | 9656 |
| COVID affected OPD patients | - | 2944 |
| COVID affected IPD patients | - | 302 |
| Deaths due to COVID | - | 15 |

Oxygen Plant and Piped in Oxygen Supply

CWS used to supply oxygen to patients through portable oxygen cylinders. During COVID pandemic oxygen cylinders were in short supply and it was a huge struggle to supply oxygen to critically ill patients in large numbers through cylinders. So the hospital decided to establish an oxygen plant and supply oxygen at the bedside of the patients through pipes.

| Finances for the oxygen plant and piped supply system. | | |
|--|---|----------------------------|
| St. Gabriel's Austria | - | 25,13,689.00 |
| CWS Hospital | - | 7,14,317.00 |
| Total Rs. | - | <u>32,28,006.00</u> |

Critical Care of Patients gets a Big Boost

CWS had a HDU (semi ICU) of 8 beds for the care of seriously ill patients and a Hemo dialysis unit with 2 dialysis machines. COVID pandemic showed the need for improving the critical care services in the hospital. Hence a 7 bed ICU was established in the old HDU in the hospital. Old HDU was relocated and refurbished with 5 beds. Two more dialysis machines were added to the existing dialysis unit. A SLEDD (Sustained Low-Efficiency Daily Diafiltration) machine was purchased for ICU. These dialysis machines were mainly financed through a donation of INR 22,00,861.00 from Mitsubishi Corporation, India.

Quality Medicines at an Affordable Price

(Pradhanmantri Bhartiya Janaushadhi Pariyojana (PMBJP)

High cost of medicines adversely affects the financial condition of ordinary patients. So hospital made a bold decision to promote generic drugs. It got a big boost with the opening of generic medicine centre under (PMBJP) of the Government of India.

Total Sales - 26,90,694.00

Patients Served – 22,294

Biju Swasthya Kalyan Yojana (BSKY)

Universal Health Assurance Scheme of the Government of Odisha was revamped in November 8th, 2021. 328 private hospitals in Odisha and 65 hospitals from other states were empanelled under BSKY to provide super speciality medical care to economically vulnerable families in the state.

CWS AND BSKY

| | |
|--|--------------|
| CWS empanelment with BSKY | 08-11-2021 |
| Patients treated till March 2022 | 285 |
| Money reimbursed by the Government to CWS Hospital | 59,95,218.00 |

Government has provided one Swasthya Mitra and CWS has 3 staff dedicated to the smooth functioning of the scheme. Medical expenses including canteen bill is covered by the scheme. All the admissions and discharges are uploaded on BSKY portal on a daily basis. A feedback register is maintained at BSKY counter at the hospital to register the response of the discharged patients. Scheme has been functioning smoothly and reimbursement by the Government has been on time till now. BSKY is a great blessing to the poor people as it provides an insurance cover of Rs. 5 Lakhs in a year to a family.

Summary Report 2021-22

Research Unit, CWS Hospital, Rourkela

Ongoing Project

There are 03 No's of ongoing projects and 02 No's of upcoming project, out of which 02 multinational and 01 No's of in-house project. The details are given below.

1.A cluster randomized trial to assess the effectiveness of malaria camps as part of the Odisha state malaria elimination drive (Phase 1, CSCMi Study Type 3).

Project Leads: Dr Praveen K. Sahu, Sr Scientist Dept of Mol. Biology and Infectious Diseases, CWS Hospital, Rourkela&Visiting Professor Sambalpur University.

Co-PI:Dr.SanjibMohanty, Sr ConsultantCWS Hospital, Rourkela;Dr.Madan M Pradhan, ADPHO & State NVBDCP, H&FW Dept, Govt of Odisha.

Prog. Director: Dr. Jane Carlton, Professor, Dept of Biology, New York University, USA.

Study Coordinator-Mr. T K Padhan, Dept of Molecular Biology and Infectious Diseases, CWS Hospital, Rourkela.

2. A study on the emergence of Scrub typhus in patients with acute febrile illness.

Project Lead: Dr.SanjibMohanty MD, Senior Consultant,CWS Hospital, Rourkela.

Co-PI:Dr Praveen K. Sahu, Sr Scientist,Dept of Molecular Biology and Infectious Diseases, CWS Hospital, Rourkela.

3. Investigation on the comparison of gut microbiome of healthy and malnourished children in Sundargarh district of Odisha.

Project Lead: Dr.KarthikaParvathy, DST WOS-B Scientist, Food Microbiology & Bioprocess Lab, Dept of Life Sci., NIT Rourkela.

Upcoming Project

1. New anti-malarial clinical drug trial by Novartis, USA-

Project Leads: Dr.SanjibMohanty, Sr Consultant; Dept of Mol. Biology and Infectious Diseases, CWS Hospital, Rourkela.

Co-PI:Dr Praveen K. Sahu, Sr Scientist,Dept of Molecular Biology and Infectious Diseases, CWS Hospital, Rourkela.

Study Coordinator-Mr. T K Padhan, Dept of Molecular Biology and Infectious Diseases, CWS Hospital, Rourkela.

2. New Artificial Intelligence for the detection of malaria parasite by Central Queensland University andCanberra university, Australia.

Project Leads: Dr Praveen K. Sahu, Sr Scientist &Dr.SanjibMohanty, Sr Consultant; Dept of Mol. Biology and Infectious Diseases, CWS Hospital, Rourkela.

Study Coordinator-Mr. T K Padhan, Dept of Molecular Biology and Infectious Diseases, CWS Hospital, Rourkela.

Research Progress

1. **CSCMi Study Type 3-** Acluster randomized trial to assess the effectiveness of malaria camps as part of the Odisha state malaria elimination drive (Phase 1, CSCMi Study Type 3) is a field cum Lab based project, which is operated in the 2 districts and later on expand to the new 05 more district of Odisha. During this financial year 2021-22, we have surveyed 15 tribal DAMaN villages (Hard to reach area villages), approximately targeted 5966 population.

During this survey we have successfully completed below mentioned task as per protocol

- 2079 people has participated in our study as per protocol.
- 2079 kit was tested for malaria, as well as slide in the field site and sample carried to the hospital Lab for molecular detection.
- Out of which 14 RDT and 56 PCR +ve, and they were treated as per the policies of MCI. The report was shared to the concern CHC/PHC.
- During this study we have also checked their blood sugar and blood pressure at free of cost.

2. During this 2021-22 financial year we have tested RDT kit for 68 patients in our lab for the malaria as per the doctor prescription and also molecular detection at free of cost.

3. Investigation on the comparison of gut microbiome of healthy and malnourished children in Sundargarh district of Odisha was successfully completed by Dr Karthika.

4. Total 22 numbers of scrub typhus cases were detected and research is under process.

5. 02 of international training were conducted by New York University at our lab.

6. 02 of virtual international training were given to our Lab tech by Swiss TPH, Switzerland.

7. 04 of webinar & 06 nos of offline training were conducted for the of staff and student.

8. 01 of PhD student from Sambalpur University is working in our Lab for his PhD thesis and 01 MSc. Student from Chandigarh university is also working in the Lab for his internship under Dr Praveen K. Sahu.

Future Collaboration for research

- Sambalpur University, Sambalpur, Odisha.
- ICMR-RMRC, Bhubaneswar, Odisha

In 2016 India introduced its First National framework for Malaria Elimination (2016-2030). In tandem Odisha has achieved a 94% decline in malaria cases from about 4.44 lakh in 2016 to 25,503 in 2021. This has been mainly achieved through DAMaN programme (DurgamaAnchalare Malaria Nirakaran) which has been launched in 2016 and is now extended upto 2030-31.

A Malaria Research Centre was established in CWS hospital in 2018-2019 with the help of international partners. This centre is studying the effectiveness of DAMaN programme in association with New York University USA and with the approval of Health and family Welfare Department of the Government of Odisha. In 2021-22 the study tested 2079 people for the presence of malarial parasite from 15 tribal villages of Keonjhar and Jharsuguda districts. 70 people tested positive for the presence of malaria parasite in their blood.

The project will cover tribal villages from the districts of Boudh, Kalahandi, Kandhamal, Rayagada, and Koraput in future.

Scrub Typhus

Scrub Typhus which causes high fever in patients is caused by the bite of a chigger mite. This illness was widely reported in Rourkela a decade back. The disease has seen re-emergence in and around Rourkela in the last few years. The research is to ascertain different clinical manifestations of the disease in the area and to validate the diagnostic card test with PCR (a molecular diagnostic method) in future.

Comparative study of microorganisms in the gut of healthy and malnourished children in Sundargarh district.

Several published studies have shown a connection between imbalance in gut microorganisms and severe malnutrition in children. The present study was to determine whether active microorganisms isolated from the fecal samples of healthy population can correct the microbial imbalance in the malnourished population of the same group. This knowledge can be used to improve the food matrix of malnourished children from that group.
